Foreword	i
Editorial note	i
Preface	1
1. RC jacketing	2
1.1 Foreword	2
1.2 Basics	3
1.2.1 When to adopt this method?	3
1.2.2 Materials	3
1.2.3 Techniques	4
1.2.4 Equipment	5
1.3 Stakeholders' roles and qualifications	6
1.3.1 Owner	6
1.3.2 Designer	6
1.3.3 Contractor	6
1.3.4 User	6
1.4 Design	6
1.4.1 Assessment of present conditions (existing concrete surface)	6
1.4.2 Design assumptions	7
1.4.3 Design procedure	8
1.4.4 Codes and other relevant references	9
1.5 Detailing	10
1.6 Execution	10
1.6.1 Preparatory works	10
1.6.2 Execution procedure	11
1.7 Quality control and monitoring	13
1.8 Case study	13
1.8.1 Description of the structure	13
1.8.2 Inspection Highlights	14
1.8.3 Description of the intervention methodology	17
1.8.4 Execution	18
1.8.5 Monitoring	20

2.	FRP jacketing	22
2.1	Foreword	22
2.2	Basics	22
2.2.1	When to use this method	22
2.2.2	Materials	23
2.2.3	FRP jacketing Systems	26
2.3	Techniques	29
2.3.1	Basic FRP technique	29
2.3.2	Automated wrapping	29
2.3.3	Textile-reinforced mortar techniques (TRM) and Fabric Reinforced Cementitious Mortar (FRCM)	30
2.3.4	Prestressed jacketing	30
2.4	Personnel and equipment	31
2.4.1	Personnel	31
2.4.2	Equipment	31
2.5	Stakeholders' roles and qualifications	32
2.5.1	Owner	32
2.5.2	Designer	33
2.5.3	Contractor	33
2.6	Design	33
2.6.1	Assessment of existing conditions	33
2.6.2	Codes and standards and other relevant references	34
2.6.3	Design procedure	34
2.7	Quality control	35
2.7.1	Quality control of materials	35
2.7.2	Quality control before intervention	36
2.7.3	Quality control of FRP Durability	36
2.7.4	Quality control during intervention	37
2.7.5	Quality control after intervention	37
2.8	Monitoring and maintenance	38
2.8.1	Monitoring	38
2.8.2	Maintenance	38
2.9	References	39

2.10 Case study 1	40
2.10.1 Description of the structure	40
2.10.2 Description of the intervention project	40
2.10.3 Description of the strengthening procedure	40
2.11 Case study 2	43
2.11.1 Description of the structure	43
2.11.2 Bridge Capacity assessment	45
2.11.3 Rehabilitation Intervention by using innovative materials	45
3. Steel jacketing	49
3.1 Foreword	49
3.2 Basics – Technique description	50
3.2.1 When to adopt this method	50
3.2.2 Techniques and materials	51
3.2.3 Equipment	54
3.3 Stakeholders’ roles and qualifications	54
3.3.1 Owner	54
3.3.2 Designer	55
3.3.3 Contractor	55
3.3.4 User	55
3.4 Design	56
3.4.1 Assessment of existing conditions	56
3.4.2 Service life and reliability requirements	56
3.4.3 Codes and standards and other relevant references	56
3.4.4 Design assumptions	58
3.4.5 Design procedure	58
3.4.6 Supporting documents	65
3.5 Execution	66
3.5.1 Preparatory works	66
3.5.2 Execution procedure	66
3.5.3 Finishing	68
3.6 Quality control	68
3.6.1 Quality control of materials before intervention	68
3.6.2 Quality control during intervention	68
3.6.3 Quality control after intervention	69
3.7 Monitoring and maintenance	69
3.7.1 Monitoring	69
3.7.2 Maintenance	69
3.7.3 Post-intervention documentation	69

3.8 Case study 1	70
3.8.1 Introduction	70
3.8.2 Description of the structure	70
3.8.3 Inspection highlights	72
3.8.4 Description of the intervention project	73
3.8.5 Seismic retrofit	74
3.8.6 Calculations for steel jacketing of a column	75
3.8.7 Description of the steel jacketing intervention works	82
3.8.8 References	83
3.9 Case study 2	84
3.9.1 Introduction	84
3.9.2 Description of the structure	85
3.9.3 Inspection highlights	86
3.9.4 Results obtained	87
3.9.5 Description of the intervention project	89
3.9.6 Description of the intervention works	90
3.9.7 Description of maintenance operations	92
4. Internally applied steel reinforcement	94
4.1 Foreword	94
4.2 Basics	94
4.2.1 When to adopt this method	94
4.2.2 Materials and systems	94
4.2.3 Techniques	95
4.2.4 Equipment	96
4.3 Stakeholders' roles and qualifications	97
4.3.1 Owner	97
4.3.2 Designer	97
4.3.3 Contractor	98
4.3.4 User	98
4.4 Design	98
4.4.1 Assessment of existing conditions	98
4.4.2 Service life	98
4.4.3 Reliability requirements	99
4.4.4 Codes and standards and other relevant references	99
4.4.5 Design assumptions	99
4.4.6 Design procedures	99
4.4.7 Supporting documents	101

4.5 Execution	101
4.5.1 Preparatory works	101
4.5.2 System trials	102
4.5.3 Execution procedure	102
4.6 Quality control	102
4.6.1 Quality control of materials	102
4.6.2 Quality control before intervention	102
4.6.3 Quality control during intervention	102
4.6.4 Quality control after intervention	103
4.7 Monitoring and maintenance	103
4.8 Case study	103
4.8.1 Description of the structure	103
4.8.2 Inspection highlights	103
4.8.3 Description of the intervention project	103
4.8.4 Description of the intervention works	104
4.8.5 Description of maintenance operations	107
5. Concrete overlays	108
5.1 Foreword	108
5.2 Basics	108
5.2.1 When to adopt this method	108
5.2.2 Materials and systems	109
5.2.3 Techniques	109
5.2.4 Equipment	110
5.3 Stakeholders' roles and qualifications	110
5.3.1 Owner	110
5.3.2 Designer	111
5.3.3 Contractor	111
5.4 Design	111
5.4.1 Assessment of existing conditions	111
5.4.2 Service life	111
5.4.3 Reliability requirements	112
5.4.4 Codes and standards and other relevant references	112
5.4.5 Design assumptions	113
5.4.6 Design procedure	113
5.5 Execution	114
5.5.1 Preparatory works	114
5.5.2 Execution procedure	114
5.6 Quality control	114
5.6.1 Quality control during intervention	114

5.7 Monitoring and maintenance	115
5.8 Literature	115
5.9 Case study	116
5.9.1 Description of the structure	116
5.9.2 Inspection highlights	116
5.9.3 Description of the intervention project	116
5.9.4 Description of the intervention works	119
5.9.5 Description of maintenance operations	119
6. Externally applied textile reinforced systems	120
6.1 Foreword	120
6.2 Basics	121
6.2.1 When to adopt this method	121
6.2.2 Materials	122
6.2.3 Techniques	122
6.2.4 Equipment	126
6.3 Stakeholders' roles and qualifications	126
6.3.1 Owner	126
6.3.2 Designer	126
6.3.3 Contractor	127
6.3.4 User	127
6.4 Design	127
6.4.1 Assessment of existing conditions	127
6.4.2 Service life	128
6.4.3 Reliability requirements	128
6.4.4 Codes and standards and other relevant references	128
6.4.5 Design assumptions	131
6.4.6 Design procedures	132
6.4.7 Supporting documents	132
6.5 Execution	132
6.5.1 Preparatory works	132
6.5.2 System trials	133
6.5.3 Execution procedure	133
6.5.4 Finishing	133
6.6 Quality control	134
6.6.1 Quality control of materials	134
6.6.2 Quality control before intervention	135
6.6.3 Quality control during intervention	135
6.6.4 Quality control after intervention	135

6.7	Monitoring and maintenance	137
6.7.1	Monitoring	137
6.7.2	Maintenance	137
6.7.3	Post-intervention documentation	137
6.8	Case study 1	138
6.8.1	Description of the structure	138
6.8.2	Inspection highlights	138
6.8.3	Description of the intervention project	139
6.8.4	Description of the intervention works	139
6.8.5	Description of maintenance operations	142
6.9	Case study 2	145
6.9.1	Description of the structure	145
6.9.2	Inspection highlights	146
6.9.3	Description of the intervention project	146
6.9.4	Description of the intervention works	149
6.9.5	Description of maintenance operations	150
6.10	Case study 3	150
6.10.1	Description of the structure	150
6.10.2	Inspection highlights	151
6.10.3	Description of the intervention project	151
6.10.4	Description of the intervention works	153
6.11	Case study 4	158
6.11.1	Description of the structure	158
6.11.2	Inspection highlights	158
6.11.3	Description of the intervention project	159
6.11.4	Description of the intervention works	159
6.11.5	Description of maintenance operations	161
7.	Externally applied or near surface mounted FRP	162
7.1	Foreword	162
7.2	Basics	162
7.2.1	Applicability of these methods	162
7.2.2	Materials and systems	163
7.2.3	Techniques and strategies	164
7.3	Design	165
7.3.1	Assessment of existing conditions	165
7.3.2	Codes and standards and other relevant references	165
7.3.3	Design assumptions	166
7.3.4	Design procedure	167
7.3.5	Supporting documents	168

7.4 Stakeholders' roles and qualifications	168
7.5 Execution	169
7.5.1 Equipment and tools	169
7.5.2 Preparatory works	169
7.5.3 Execution procedure	169
7.5.4 Finishing	182
7.6 Quality control	182
7.6.1 Quality control of materials	182
7.6.2 Quality control before application	182
7.6.3 Quality control during intervention	183
7.6.4 Quality control after intervention	183
7.7 Monitoring and maintenance	183
7.8 Case study 1	183
7.8.1 Description of the structure	184
7.8.2 Description of the intervention project	184
7.8.3 Description of the strengthening procedure	185
7.9 Case study 2	188
7.9.1 Description of the structure	188
7.9.2 Strengthening program	189
7.9.3 Description of the strengthening procedure	189
7.9.4 Flexural strengthening	192
7.9.5 Shear strengthening	192
8. Strengthening foundations with steel micro-piles	194
8.1 Foreword	194
8.2 Basics	194
8.2.1 When to adopt this method	194
8.2.2 Materials and systems	195
8.2.3 Techniques	196
8.2.4 Equipment	196
8.3 Stakeholders' roles and qualifications	196
8.3.1 Owner	196
8.3.2 Designer	197
8.3.3 Contractor	197
8.3.4 User	197
8.4 Design	197
8.4.1 Assessment of existing conditions	197
8.4.2 Service life	198
8.4.3 Reliability requirements	198

8.4.4	Codes and standards and other relevant references	198
8.4.5	Design assumptions	199
8.4.6	Design procedure	199
8.4.7	Supporting documents	200
8.5	Execution	200
8.5.1	Preparatory works	200
8.5.2	System trials	200
8.5.3	Execution procedure	200
8.5.4	Finishing	200
8.6	Quality control	201
8.6.1	Quality control of materials	201
8.6.2	Quality control before intervention	201
8.6.3	Quality control during intervention	202
8.6.4	Quality control after intervention	202
8.7	Monitoring and maintenance	203
8.7.1	Monitoring	203
8.7.2	Maintenance	203
8.7.3	Post-intervention documentation	203
8.8	Case study 1	204
8.8.1	Description of the structure	204
8.8.2	Inspection highlights	204
8.8.3	Description of the intervention project	205
8.8.4	Description of the foundations strengthening works	205
8.8.5	Description of maintenance operations	207
8.9	Case study 2	207
8.9.1	Description of the structure	207
8.9.2	Inspection highlights	207
8.9.3	Description of the intervention project	207
8.9.4	Description of the foundations strengthening works	208
8.9.5	Description of maintenance operations	210
9.	Impressed current cathodic protection and structural strengthening (ICCP-SS) intervention technique	211
9.1	Foreword	211
9.2	Basics	212
9.2.1	When to adopt this method	212
9.2.2	Materials and systems	212
9.2.3	Techniques	213
9.2.4	Equipment	213

9.3 Stakeholders' roles and qualifications	213
9.3.1 Owner	213
9.3.2 Designer	214
9.3.3 Contractor	214
9.3.4 User	214
9.4 Design	214
9.4.1 Assessment of existing conditions	214
9.4.2 Service life	215
9.4.3 Reliability requirements	215
9.4.4 Codes and standards and other relevant references	215
9.4.5 Design assumptions	217
9.4.6 Design procedure	217
9.4.7 Supporting documents	218
9.5 Execution	218
9.5.1 Preparatory works	218
9.5.2 System trials	219
9.5.3 Execution procedure	219
9.5.4 Finishing	220
9.6 Quality control	220
9.6.1 Quality control of materials	220
9.6.2 Quality control before intervention	220
9.6.3 Quality control during intervention	221
9.6.4 Quality control after intervention	221
9.7 Monitoring and maintenance	221
9.7.1 Monitoring	221
9.7.2 Maintenance	222
9.7.3 Post-intervention documentation	222
9.8 Case study	222
9.8.1 Description of the structure	223
9.8.2 Inspection highlights	223
9.8.3 Description of the intervention project	224
9.8.4 Description of the intervention works	227
9.8.5 Description of maintenance operations	229
9.8.6 Monitoring and review	229
9.8.7 Final remarks	230

10.	Frame encasement (shear walls)	231
10.1	Foreword	231
10.2	Basics	231
10.2.1	When to adopt this method	231
10.2.2	Materials and systems	232
10.2.3	Techniques	232
10.2.4	Equipment	237
10.3	Stakeholders' roles and qualifications	237
10.3.1	Owner	237
10.3.2	Designer	238
10.3.3	Contractor	238
10.3.4	User	238
10.4	Design	238
10.4.1	Assessment of existing conditions	238
10.4.2	Service life and reliability requirements	239
10.4.3	Codes and standards and other relevant references	239
10.4.4	Design assumptions	240
10.4.5	Design procedures	241
10.4.6	Supporting documents	246
10.5	Execution	247
10.5.1	Preparatory works	247
10.5.2	System trials	247
10.5.3	Execution procedure	247
10.5.4	Finishing	248
10.6	Quality control	248
10.6.1	Quality control of materials	248
10.6.2	Quality control before intervention	248
10.6.3	Quality control during intervention	249
10.6.4	Quality control after intervention	249
10.7	Monitoring and maintenance	249
10.7.1	Monitoring	249
10.7.2	Maintenance	249
10.8	Case study	250
10.8.1	Introduction	250
10.8.2	Description of the structure	250
10.8.3	Inspection highlights	250
10.8.4	Description of the intervention project	251

10.8.5	Seismic retrofit	251
10.8.6	Calculations for new shear wall	252
10.8.7	Description of the frame encasement intervention works	262
10.8.8	References	263
11.	External post-tensioning	264
11.1	Foreword	264
11.2	Basics	264
11.2.1	When to adopt this method	264
11.2.2	Prestressing elements	265
11.2.3	Materials	266
10.2.4	Prestressing equipment	267
11.3	Stakeholders' roles and qualifications	268
11.3.1	Owner	268
11.3.2	Designer	268
11.3.3	Contractor	268
11.4	Design	269
11.4.1	Assessment of existing conditions	269
11.4.2	Service life	269
11.4.3	Reliability requirements	270
11.4.4	Codes and standards and other relevant references	270
11.4.5	Design assumptions	270
11.4.6	Design procedure	271
11.4.7	Supporting documents	272
11.5	Execution	273
11.5.1	Preparatory works	273
11.5.2	System trials	273
11.5.3	Execution procedure	274
11.5.4	Finishing	274
11.6	Quality control	274
11.6.1	Quality control of materials	274
11.6.2	Quality control before intervention	275
11.6.3	Quality control during intervention	275
11.6.4	Quality control after intervention	275
11.7	Monitoring and maintenance	275
11.7.1	Monitoring	275
11.7.2	Maintenance	276
11.7.3	Post-intervention documentation	276

11.8	Case study	277
11.8.1	Introduction	277
11.8.2	Selection of post tensioning system	278
11.8.3	Execution of retrofitting work	281
11.8.4	Conclusions	288
12.	Seismic protection techniques	289
12.1	Foreword	289
12.2	Part I – Buildings	290
12.2.1	Base isolation	290
12.2.2	Energy dissipation devices	296
12.3	Part II – Bridges	301
12.3.1	Basics	301
12.3.2	Design	304
12.3.3	Execution	306
12.4	Part III – Buildings and bridges	307
12.4.1	Quality control	307
12.4.2	Monitoring and maintenance	307
